

# Accounting

**BACHELOR OF SCIENCE**

A BS Accounting at the American University of Malta assists you from scratch with laying a solid foundation all the way through the processes associated with the different strands of accounting. Whether you're an aspiring number cruncher with a knack for financial organization, a financial strategist who thrives on navigating companies towards growth, or you possess a sleuth-like mind that inspires you to audit from the inside or investigate externally, we'll nudge you forward towards answering your calling.

Here at AUM, we value the ability to translate overarching theories and concepts into concrete skills that are carried on into your career after graduation. That's why our faculty members are both well-versed in the theories, principles, and procedures from an academic perspective and seasoned veterans with hands-on experience in professional business and accounting environments. They know how to help set you on track towards actualizing your knowledge and asking the right questions.

Interested in obtaining CPA certification? We make sure that you cover all the ground necessary. Our Degree in Accounting adheres to the CPA certification standards by implementing all the necessary courses into the program.

At AUM, you'll immerse yourself into our General Education Program (GEP) and build your major in accounting atop it. This means that you'll graduate a well-rounded student of liberal arts with a sharp focus and shrewd grasp of accounting.
